Re: July 2010 Soil Gas and Ambient Air Sampling Results and Evaluation, Former Communications Site, (Taku Gardens), Fort Wainwright Alaska

Dear Mr. Malen:

The Alaska Department of Environmental Conservation (DEC) received the referenced report on September 25, 2010.

General observation on the report notes that the sampling crew does not understand the use of the building survey as only one building survey was completed and there is no information on the relative location of the indoor air sampling canister to the fresh air exhaust into the homes.

The report does appear to document the variability of the vapor sampling results and the values obtained during this round of sampling.

DEC has no specific comment on the report.

Sincerely,

Deb Caillouet
Environmental Program Specialist
