

Amphetamines

What are Amphetamines

- Amphetamines are drugs that are classified as Central Nervous System (CNS) Stimulants.
- Amphetamines are also drugs that induce false feelings strength and enhanced motivation.
- Amphetamines can be divided into three basic groups:
 - Amphetamine (Benzedrine)
 - Dexamphetamine (Dexedrine)
 - Methamphetamine (Methedrine)

Learning Objective

- State the definition of CNS Stimulant
- Identify the effects of amphetamines

Why are Amphetamines Used

- Amphetamines can be used for medicinal purposes.
- The most common legal uses today are to treat:
 - Narcolepsy
 - Hyperactivity (in children)
- They are also used for illicit purposes, the most common of which is to stay awake for long periods of time.
- Used by drug users to treat the unpleasant effects of other drugs.

How are Amphetamines Consumed

- Orally – In pill, tablet, or liquid form
- Snorted – This can cause severe damage to the interior and exterior of the nose
- Injected –
 - Into the blood stream
 - Into muscle tissue
- Smoked

Effects of Amphetamines

Short Term

- Dilated Pupils
- Increased Blood Pressure
- Increased Heart Rate
- Decreased Appetite
- Dry Mouth
- Tremors
- Dizziness / Nausea
- Irregular Heartbeat
- Loss of Coordination
- Sudden Collapse
- Loss of Consciousness

Effects of Amphetamines

Long Term

In addition to those listed below amphetamine use can cause the users to have long term problems with high blood pressure, irregular heartbeats, and severe sleeping disorders.

Malnutrition – Because Amphetamines reduce the users appetite, they are less likely to eat properly and because of this are less resistant to infections.

Chronic Psychosis – Symptoms include paranoia, delusions, and bizarre behavior. This can be seen as early as 1 week after the user has stopped using.

Chronic Anxiety/Tension - To combat this users often turn to alcohol and barbiturates for help. Chronic Anxiety may also lead to violent behavior.

Brain Damage – Long term use of Amphetamines can cause damage to the brain, specifically areas that deal with memory and everyday thinking.

Additional Information

Additional information on amphetamines can be found by contacting the Army Substance Abuse Program or by visiting www.acsap.army.mil.

WARRIOR

Personal **Courage:** Possess the Personal Courage not to use drugs or abuse alcohol and to notify the Chain of Command of Soldiers that do.
