

Meeting Team Taku
Tuesday, 5 July 2006, 1305-1450

Attendees: Joseph Malen, Rielle Markey (USAGAK Env); Sharon Richmond, John Wentz, John Beier (USACOE AK District FWA);

Topics of Discussion:

Items from last meeting:

Scheduling of TRIAD/DQO meeting with RPMs: This meeting has been scheduled to occur on July 18th, Tuesday at 1400 after the weekly conference call.

Finalized list of remaining excavations to be completed by winter

John Wentz sent an email with a listing of individual tasks that need to occur before winter onsite. We discussed each task, but without input from EPA we decided to postpone an action decision. In addition, it will be much more proficient to act on the items as one group so that John only generates one letter for the contractor.

Miscellaneous:

Sharon said that ADEC is reviewing several requests for dewatering for projects on Fort Wainwright. She would like more information about how these dewatering events will impact contamination that is on TAKU. Arrangements were made to take Sharon around to see where some of these dewatering projects are.

Miscellaneous

The next meeting is scheduled for Tuesday, 11 Jul 2006, 1300-1400. Joe Malen will be initiating the call and sending out the meeting notes upon completion of the call.
