## 24 April 2007 Taku Conference Call Meeting Minutes

Attendees: Rielle Markey; Joseph Malen (USGAK); Jacques Gusmano (USEPA); Colin Craven, Sharon Richmond (ADEC); Robert Brock, Julie Sharp-Dahl (USACOE AK District Anch)

The following topics were discussed during this meeting:

- a. Joe mentioned that Jack and he were interviewed by the US Army Criminal Investigation Division, Major Procurement Fraud Division regarding contract actions on Taku. Joe also mentioned that the investigator requested everybody's name and contact info for future interviews so don't be alarmed if he calls.
- b. PSE 1 Interim Final Report was distributed and we're waiting for everybody to look at it again. Julie made new copies for everyone to include a new data disk. It was also mentioned that the PCB Manifests that were included in the document were not the final ones. They will be included at a later time. Sharon mentioned that she would put it on the State's "G" Drive for easier distribution to concerned folks.
- c. Joe led discussion re: Spring 07 groundwater sampling event. We will be using EPA Method 8081 for pesticide testing; adding 8151 for chlorinated pesticides; adding Thyio-di-glycol (to be sent to Edgewood for analysis) and dropping Anions, Dioxins, and Furans. NWI will be gone after this sampling event. CH2M Hill will be the new contractor from here on.
- d. More wells will be installed this year. Locations will be submitted to everybody for input prior to installation.
- e. WCC is still conducting site clean-up. They are removing trash and left over big items. Will not get little things like nails or other small items. Everybody be careful when driving on site.
- f. Everyone was asked to review and comment on CH2 work plan quickly so they can get in the field.
- g. CH2 will be conducting a site visit next week. Everybody is invited to attend. Bob Brock said he would try to be there.
- h. Question was asked if CH2 was bringing a field lab on-site this year to expedite the RI. Julie said they were not tasked to do so and that they will probably use STL.
- i. Joe mentioned that the ELD folks wanted us to sample analyze "white powder" complete TCLP. We sent NWI to sample the material left on site, but there's not enough material to conduct TCLP. Julie said she would resend the lab analyses from the PSE 1.
- j. Joe is still trying to coordinate with Ft. Richardson EOD folks for USAGAK ESS (Explosive Site Safety) plan.

- k. There will be a Gov't Only teleconference with Huntsville, AK District, and DPW on 25 April 07 at 9-7 AM (AST) regarding the need for an ESS. Sharon and Jack will wait for the Army to figure out what is needed and provide whatever plans are required.

There were no other comments made. Please feel free to provide corrections or additional data to Joe Malen for inclusion in the final document.
