Administrative Record for U.S. Army  
102 Former Communications Site (Taku Gardens)

Introduction

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986 requires the establishment of administrative records.

The administrative record established under § 113(k) of CERCLA serves two primary purposes. First, the record contains those documents that form the basis for selection of a response action under § 113(j). Judicial review of any issue on the adequacy of a response action is limited to the record. Second § 113(k) requires that the administrative record act as a vehicle for public participation in selecting a response action.

This administrative record file and accompanying index have been compiled according to provisions of the U.S. Environmental Protection Agency's Office of Solid Waste and Emergency Response (OSWER) Directive No. 9833.3A-1, "Final Guidance on Administrative Records for Selecting CERCLA Response Actions."

The documents included in this administrative record are a subset of information included in the project files for this site. Documents contained in the administrative record file are identified with unique numbers to aid in tracking and retrieval of the documents. The index and file will be updated as new documents become available. As the updates are issued, the file will be inventoried against the new index to ensure its completeness.

According to OSWER Directive No. 9833.3A-1, certain documents are not physically included in this administrative record file but are included for reference. Among these documents are chain-of-custody forms and sampling data, such as laboratory analytical results. The sampling data are summarized in the reports included in the administrative record file. Typically, the sampling data and related chain-of-custody forms are retained by the contractors that published the reports and/or their subcontractors. To receive further information concerning specific sampling data and chain-of-custody forms, please reference the document number of the report and write to the individual identified below.

Please forward any questions, comments, or requests for additional information or copies to:

(Note: Costs for copies are borne by the requester.)
